DESCRIBE THE WORK THE GRANT IS NEEDED FOR (Be specific, use continuation sheet if needed)

The mausoleum caulking between the building structure and the roof and between the roof slabs has completely deteriorated and needs replaced. Also, the building mortar lines are showing evidence of deterioration and the building structure should be re-pointed.

The design of these older mausoleums have not worked well with just modern silicone caulking measures. Silicone only seals them too well and the trapped moisture and humidity actually causes other problems and the premature deterioration of the silicone caulking. Mortar is semi-permeable. All silicone can be less expensive due to less tooling. For the A.P. Davis mausoleum silicone caulk will be used on the horizontal joints (skyward facing joints) and mortar for vertical joints.
