BALL GROUND, GEORGIA

Georgia Marble

Georgia Marble is so well and favorably known that it is unusual for any one to question its durability. For the benefit of any who may not have personal knowledge of Georgia Marble, we offer the following information:

The analysis of Georgia Marble, made at Worcester Polytechnic Institute, is as follows:

Carbonate of Calcium -----	98.96%
Carbonate of Magnesium -----	0.13%
Alumina -----	0.22%
Silica -----	0.61%
Loss -----	.08%
	<hr/>
	100.00%

The nearer any material is of one ingredient, the better it will wear, and this fact, together with its interlocking crystals, is why Georgia Marble answers all the requirements of a lasting material.

Georgia Marble is of crystalline formation and the tiny crystals interlock and overlap, presenting an airtight, waterproof surface to the elements. Impervious alike to the elements and time. As the absorption of moisture is the first step in the disintegration of a stone, it can readily be seen that the formation of Georgia Marble makes it durable beyond question.

The United States Government SPECIFIES GEORGIA MARBLE AS THE ONLY STONE REQUIRING NO WATER-PROOFING for Government buildings.

There is no better material to be had for monuments than Georgia Marble.

Granite

When the designs in this book are suitable for Granite monuments, we quote prices for that material. Our plant is equipped to furnish any size Granite monument, and we use the very best Granite.

Other Materials

We believe we are offering the best monumental stones in existence, but we will be glad to quote prices on any other material should a customer desire something different. There is one exception, however, and that is we will not quote prices on limestone monuments or limestone bottom bases. We do not consider this a suitable material for any part of a monument and do not care to risk our reputation by offering a material that we can not guarantee absolutely, and which would not be a credit to this company when erected.

Changes in Designs

We are always glad to make any changes in the cutting or carving of our monuments that may be desired by the customer. If the change as requested adds to the cost of the monument, we will send you invoice based on actual extra expense. On the other hand, if the change requested reduces the cost of the monument, we will give your customer the advantage of that difference.

Lettering

Be sure that the inscriptions, as written on the order, are correct. Great care should be exercised in writing the inscriptions. Make every letter and figure plain—so plain that there will not be any doubt about the inscription.

All of the quoted prices include the carving of any ordinary inscription, and a verse of not more than forty letters (on double or triple monuments, two or three inscriptions and verses.)

Public Monuments

When a public monument is proposed to be erected in your territory, if you will send us all the information obtainable as to size of monument, price set aside for its purchase, and any particular preference as to style of design, we will be glad to get up a special drawing and send to you with quotation.

GUARANTEE

We do not sell anything we can not absolutely guarantee. "Time Proof" monuments are guaranteed to be finely finished, sound material, and to be satisfactory in every particular. Here is our guarantee which you will please read to your customers:

We guarantee any monuments ordered from us to be exactly as described, made of best materials, and carved, lettered and finished in the best workmanlike manner.

We agree to replace, absolutely free of charge, any part of a monument sold by us that is not perfectly satisfactory.

We guarantee that each piece of every monument shall arrive at the railroad station at destination in perfect condition. If any damage should occur in transit, we bind ourselves to replace the damaged piece. All we ask is that the railroad agent note damage on freight bill and that we receive the same within ten days of arrival of shipment at the railroad station.

Experience

It is natural that you should want to know something of the responsibility of the company, and their experience in manufacturing monuments.

We have been manufacturing and selling monuments since 1904. Our business has grown to such an extent that we have a very large plant equipped with every kind of machinery that will enable us to make a better class of monuments. We attribute our success to our satisfied customers.

The value of the good will of our customers can not be estimated, and you may rest assured that we will do nothing to hurt the reputation built up by the thousands of absolutely satisfactory "Time Proof" monuments we have shipped.

EPITAPHS

Any one of the following verses may be used without adding to the cost of a monument. If you select one not shown in this list, you are allowed forty letters.

Manufacturing in quantity always lowers cost. We make monuments in large quantities and therefore can sell monuments of equal quality for a lower price than the small dealer who makes only a few stones a month.

W. O. W. MONUMENTS

Designs numbered from 8000 to 9000

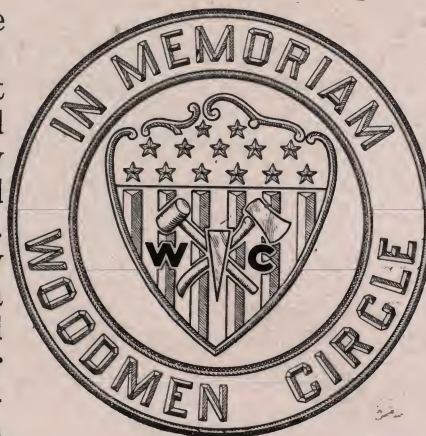

On this and following page we will try to give you instructions that will enable you to answer intelligently all questions with reference to Woodmen of the World monuments.

1. It is well to keep in close touch with the officers of your local W. O. W. Camp, and any other camps that may be located in your territory. Let the officers know that you are in position to furnish the very best W. O. W. memorials, and urge their consideration of your offer of contract. With one of our W. O. W. monuments erected in your territory, you can readily convince your customer of the superiority of our work.

2. When a W. O. W. monument is to be erected in your territory, get the beneficiary's permission to erect the memorial and have her select the design. If she isn't entirely pleased with any of the designs showing W. O. W. emblems, she may select any other design in this book that is priced at \$100.00 or more, and we will cut the emblem in accordance with the official requirements. If a monument of a greater price than \$100.00 is selected the beneficiary will be expected to pay the excess over \$100.00.

3. If an emblem other than the W. O. W. is wanted cut on the monument, it will be necessary that the beneficiary select a memorial costing \$200.00 or more; she to pay the amount over the \$100.00 paid by the W. O. W. The W. O. W. erects a monument to the memory of their deceased Sovereigns as a mark of respect of the Order, and according to their ruling another emblem cannot be cut on the monument unless at least \$100.00 is added by the beneficiary to the cost of the monument. Section 71 of the Constitution and By-Laws reads as follows: "No em-

blem of any secret, social or other fraternal beneficiary order shall be placed or carved thereon unless such order, or the beneficiary, friends or relatives of the deceased Sovereign contribute a like or greater amount towards the erection of said monument.”

4. As soon as the death claim of the deceased Sovereign has been approved by the Head Camp, they will send Proposition Sheets to the Clerk of the local Camp nearest to where the deceased is buried. These sheets are to be filled out in duplicate; giving full description of the monument, signed by the contractor and the local camp officers and returned to the Sovereign Commander for his acceptance. You may send the sheets to us for our signature and we will fill out and return for the signature of the local officers, or to save time, just have the officers sign the sheets and send them to us to be completed. You understand that one copy of the Proposition Sheets, when approved, will be returned to the Clerk of the local Camp, while the other copy will be sent to us as our authority for finishing and shipping the monument.

5. When sending us Proposition Sheets, kindly enclose one of our regular order blanks properly filled out. Let the order give full information as to design, material, shipping instructions and inscription.

6. The Proposition Sheets have printed on their back a blank that must be signed by the owner of the lot where the deceased Sovereign is buried. This applies only to cemeteries where the lots are owned by individuals. If the Sovereign is buried in a public cemetery, it is only necessary to write across the blanks the words “Public Cemetery.”

7. The Sovereign Commander has ruled that no officer of a local Camp may act as a representative of a company selling monuments. This ruling was made necessary because of the effort of some companies to engage Clerks to act as local representatives simply for their influence in handling W. O. W. orders.

8. Do not send Proposition Sheets direct to the Sovereign Commander. Send them to us and we will forward to the Sovereign Commander after we have given all the information required. Be sure to send us both Proposition Sheets. They must be executed in duplicate.

If you are in doubt about any question, do not hesitate to write us. We will take pleasure in giving you the desired information.

MARBLE COPING AND POSTS

Sizes are shown in price list. Coping can be used with or without posts.

9050

GRANITE COPING AND POSTS

While granite coping matches a granite monument excellently, marble coping in combination with granite monuments is often used.

MAUSOLEUM "A"

The prices on mausoleums do not include cost of erection, as this varies in different localities. It must be estimated separately for each sale.

MAUSOLEUM "B"

The two mausoleum designs we show are as low priced as it is practical to build a memorial of this kind. We are prepared to quote on any other style, but the prices will range upward from those shown.

CONFEDERATE MONUMENT

Public monuments of this kind are always sold from special designs. We will be glad to estimate on any public monuments when asked to do so.

A small, rectangular logo with a decorative border. At the top center is a stylized monogram 'RP'. Below it, the text 'RURALIST PRESS INC.' is printed in a bold, sans-serif font.
