way to the mill n37.11556 w93.40716

WILSON'S CREEK
Way to the Mill

Many before you have traveled the path to the mill. Although our reasons have changed, the way to the mill has always been popular.

In the days before supermarkets and, pre-packaged "ready-made" foods, families depended on small mills such as Mr. Gibson's. Here, their grain was ground into flour and meal, ingredients for many cooking needs. Historical evidence indicates that the Gibson mill was also a wool carding mill preparing the woolen fibers for future spinning and weaving. From miles around, the farmers and wagons would gather at the mill. Political discussions, weather forecasts and talltales would fill the air as each party waited their turn beside the large creaking water wheel.

The coming of railroads, grain elevators, and large steam powered roller mills signaled the beginning of the end for mills like the Gibson's. Yet, today as we travel the path to the mill, the thought of that lost way of life can supply us with much to take back home.

WILSON'S CREEK

Way to the Mill

Wilson's Creek is a tributary of the Mill River. It flows through the Mill River watershed and is a popular spot for fishing and hiking. The creek is named after John Wilson, a pioneer who settled in the area in the 18th century. The creek is a beautiful natural resource and is an important part of the local ecosystem.
