Providence Spring

During a heavy rainstorm on August 14, 1864, a spring suddenly gushed from this hillside. The prisoners were desperate for fresh water, and over time the event became legendary. Several men claimed to have seen lightning strike this spot just before the spring burst forth.

This damp slope, with its many natural seeps, would appear to be a likely site for a spring. Workmen may have inadvertently buried the spring's outlet while digging the stockade trench. Whether an act of nature or divine providence, the effect of the stream was an answer to thousands of prayers.

"A spring of purest crystal water shot up into the air in a column and, falling in a fanlike spray, went babbling down the grade into the noxious brook. Looking across the dead-line, we beheld with wondering eyes and grateful hearts the fountain spring."

John L. Maille, 8th Michigan Infantry
August 15, 1864

Former prisoners met at
Providence Spring on Decoration
Day, 1897. The spring was still
vivid in their memories.

Providence Spring was not exactly
fit the Pavilion site but on this slope
within the dead-line. At first,
prisoners reached the spring by
tying cups to tent poles, but guards
later allowed them to trough the
water into camp.

Former prisoners met at Providence Spring on Decoration Day, 1867. The spring was still vivid in their memories.

Providence Spring was not nearly as the tradition says but no less dear within the dead-line. At last, prisoners claimed that spring by being kept in such pain, but guards have allowed them to trough the water into canteens.
